

Material	Description	Common Uses
Flexible		
Decal (Sticker)	This decal material is meant for permanent and semi-permanent applications. It is a 'peel and stick' product which includes a printed sticker on a peelable wax paper backing. Suitable for use on many surfaces such as plastic, glass and metal; not suitable for use on vehicles. Can be cut-to-shape.	Promotional stickers, hard hat decals, product labels
Polypro	A thin, plastic-like material that is waterproof and resistant to rips and tears. For use in retractable banner stands, as posters, and many applications where a paper product is not durable enough.	Banners, posters, nameplates
Tyvek	Flexible, durable, and waterproof, Tyvek is an inexpensive option for banners and posters.	Posters
Smoothface Screentex Vinyl	This vinyl product is very smooth, waterproof, and durable. It can be printed on both sides and is most often used for temporary banners, or banners that will be used indoors. Products made with this material can be hung, used with X-Banner Stands, or affixed to a surface with heavy duty double-sided tape.	Banners
Outdoor Vintex Vinyl	This is a heavy-duty vinyl banner material intended for long-term use and use outdoors. It can be printed on both sides. Products made with this material can be hung with grommets or can be sewed with pockets for hanging or stretching on a display or frame.	Banners, screens
Frosted Etch (Printable)	A translucent adhesive film that creates the appearance of frosted glass. It can be used as-is, or digitally printed with graphics, or cut into shapes.	Privacy film, frosted windows, frosted decals, directory plaques, wayfinding signage
Mesh Banner	A heavy-duty fabric-like material with a loose knit for air to pass through. Useful for long- or short-term use in windy outdoor areas. Can be printed on one side only. Grommets or pockets can be added for hanging/installation.	Outdoor banners, screens
Phototex Decal (Repositionable)	A repositionable decal that can be applied to a clean surface, removed, and reapplied several times. Printable with full colour graphics.	Ads, promotions, for mirrors, glass,
Static Cling (White / Clear)	A thin, flexible film that uses static instead of adhesive to stick to a clean flat surface, usually glass. Comes in clear or white, and is printable on one side only. The product includes a paper backing from which the cling is removed, and can be replaced onto the backing for reuse.	Ads, promotions, logos,
60/40 Window Perf	Window perf is a printable film product with many tiny holes that offers a similar effect to a two-way mirror. When applied to glass, printed graphic can be seen on one side, and you can see through the graphic and material on the other side.	Vehicle windows, shop windows, buses
UV Fabric	A lightweight fabric that can be printed with high resolution graphics on one or both sides.	posters, presentation graphics,
3M 180CV w/ Protective Laminate	A highly versatile printable adhesive film used for vehicle graphics, wall murals and more. It can be laminated to achieve the desired finish, and can be wrapped around corners and complex contours.	Vehicle graphics, wall murals, wall/floor decals, graphic panels, windows
Vehicle Grade Magnetic	A strong magnetic material for use on vehicles and other magnetic surfaces.	vehicle magnets, fridge magnets, metal door signs
Rigid		
Coroplast (4mm / 6mm / 10mm)	Coroplast (corrugated plastic) is a relatively inexpensive plastic product with two flat sides and corrugated "flutes" in between. It is durable, versatile, and can be used indoors and outdoors.	lawn signs, real estate signs, notices, safety / construction site signage, zoning signs
Sintra (1/8" 1/4" 1/2")	A heavy-duty pressed plastic with a smooth face and high-end appearance. Graphics can be printed directly on the surface, or printed to decal and then applied. Notches can be cut into the back for hanging.	Posters, Presentation Boards
Dibond (White / Brushed Silver)	Dibond is two thin sheets of aluminum with a PVC core in-between. It is highly durable and versatile, and has a long life indoors or outdoors (subject to weather conditions). Printable on one or both sides.	Parking Signs, Wayfinding Signs, Building Signs, Permanent Notices
Foam Core	A lightweight foam board with a flat paper surface on either side. Somewhat subject to bumps and dents, foam core is great for short-term use and/or gentle handling.	Posters, Presentation Boards, Plaques
Gatorboard	A heavier foam core board with a lightweight plastic surface on either side.	Posters, Presentation Boards, Plaques
1/2" Plywood	A pressed board used for outdoor signage.	Commercial Real Estate Signage
1/2" Crezon	A wood board used for long-term outdoor signage.	Commercial Real Estate Signage
